SUMMARY

Machine Learning and Applied AI Researcher, combining a deep technical foundation in machine learning with dual Master's degrees in Mechatronics and Artificial Intelligence. I specialize in developing multimodal LLM architectures, federated learning frameworks, and advanced computer vision pipelines. Beyond algorithmic research, I am deeply passionate about human-AI interaction, AI outreach, and building production-ready systems that bridge the gap between complex theoretical models and tangible, real-world applications. My ultimate drive is to build intelligent, embodied systems that actively engage and augment human capabilities.

WORK EXPERIENCE

Machine Learning Researcher | Technical University of Munich Febr 2023 – Present

- **Applied AI & LLMs:** Architected proactive video assistants and simulated medical communication environments using multimodal AI and Large Language Models (Python, PyTorch).
- **Federated Learning & Privacy:** Engineered novel federated machine learning frameworks to optimize edge-computing training efficiency, alongside privacy-preserving multimodal pipelines for affective computing.
- **Strategy & Leadership:** Serve on the TUM EdTech Center management team, leading the coordination of strategic events, cross-functional projects, and the design of digital advertising and social media initiatives.
- **AI Outreach & Teaching:** Design and lead the hands-on "Creative with AI" (Kreativ mit KI) workshop at Schloss Elmau for diverse stakeholders, and instruct university courses on Human-AI Interaction and machine learning.

Working Student | Siemens Healthcare GmbH Apr 2022 – Jan 2023

- US Patent (WO2024108104): Systems and Methods for Classifying Blood Cells
 - Engineered an automated computer vision pipeline utilizing GAN-based style transfer and multi-output learning to virtually stain and classify unstained blood cells.
 - Developed and trained deep learning models using Python, PyTorch, and OpenCV, optimizing both image quality metrics (SSIM, LPIPS) and diagnostic accuracy to replace costly chemical staining.

Research Assistant | Helmholtz AI Sep 2021 – Mar 2022

- Developed a full-stack web application for an interactive MRI viewer, integrating and deploying ML models for automated image analysis.
- Built the backend and frontend infrastructure using Flask, Python, and PyTorch, alongside medical imaging libraries for DICOM visualization.

Trainee | Knorr Bremse Jun 2019 – Jan 2020

- Designed and simulated Electronic Air Control (EAC) systems utilizing MATLAB and Simulink for model-based development and control logic.
- Automated system testing and data logging pipelines by writing Python scripts and managing performance data with SQLite.

KEY SKILLS

- Applied Machine Learning
- Multimodal AI & LLMs & VLMs
- Computer Vision & GANs
- Model Deployment (MLOps)
- Technical Communication
- Project Management

LANGUAGES

- English: C1
- German: C1
- Hungarian: Native

EDUCATION

PhD Candidate | Technical University of Munich

Feb 2023 – Present

- PhD Dissertation: AI-Driven Educational Technologies: From Detection to Engagement
- TUM School of Computation, Information and Technology (CIT)
- Advisor: Prof. Dr. Enkelejda Kasneci
- Munich Center for Machine Learning (MCML) member

Master's Degree | Technical University of Munich

Oct 2020 – Feb 2023

- Major in Robotics, Cognition, Intelligence
- Thesis: Classification and Digital Staining of Red Blood Cells with Deep Learning

Master's Degree | Budapest University of Technology and Economics

Feb 2020 – Jan 2022

- Major in Mechatronics Engineering
- Specialization: Intelligent Embedded Mechatronic Systems
- Thesis: Deep Learning-Based Classification of Left Ventricular Hypertrophy

Bachelor's Degree | Budapest University of Technology and Economics

Sep 2016 – Jan 2020

- Major in Mechatronics Engineering
- Thesis: Examination of the Deformation of Vehicle Quarter Glass Injection Moulding Elastomers Caused by Compressed Air (**National Students' Science Conference, 2019 (Second place)**)
- ERASMUS Semester (Oct 2018 – Feb 2019) with Campus Mundi scholarship at the Karlsruhe Institute of Technology
